

## edu(K<sup>12</sup>)ate<sup>™</sup> and webBook Integration

### Integrated Assessment Methods

This facility provides simple integration between eduKate and TASS.web to allow the entry of student academic results for use in the production of Academic Reports.

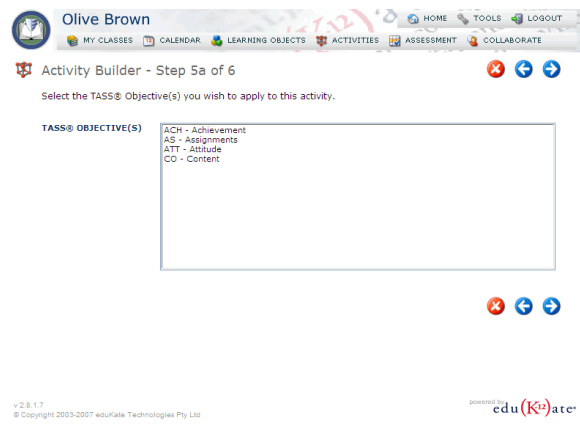

The eduKate/webBook integration facility allows teachers to create activities in eduKate™; based on assessment criteria setup in TASS®.

Marks and Comments entered through eduKate can then be combined with other assessment information in webBook to produce final academic reporting (using TASS.web Academic Reporting module).

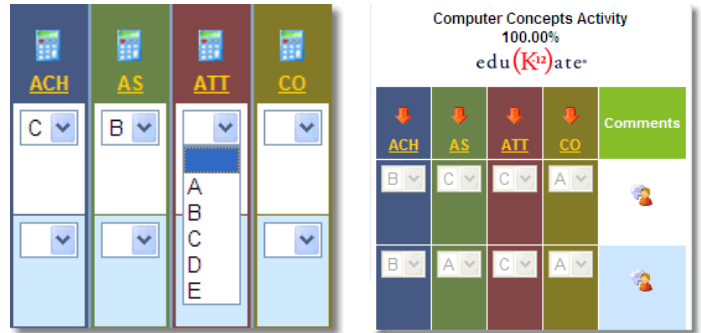

### eduKate™ Activities using TASS Objectives

File Submission and Offline Activities can be created within eduKate using TASS criteria as Assessment Methods.

### Assessment Using TASS Objectives

Completed Activities can be assessed in eduKate using the TASS Objectives and valid results.

The Results and Student Comments entered in the assessment area of eduKate™ will be displayed in webBook and used by TASS.web Academic Reporting module for production of Student Academic Reports.
